PROFESSIONAL SUMMARY

Full-Stack Developer (B.Tech CSE, expected 2027) building end-to-end web applications with React, Node.js, Express, and MongoDB. Experienced in designing RESTful APIs, implementing JWT-based authentication and authorization, and working across the stack from responsive UI to database schema design.

TECHNICAL SKILLS

Languages: C++ • JavaScript • Python

Frontend: React.js • HTML5 • CSS3

Backend: Node.js • Express.js

Database: MongoDB • Mongoose

Tools & Technologies: Git • GitHub • Postman • VS Code

PROJECTS

DevTinder — Developer Networking Platform | *Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt*

- Built a RESTful backend for a developer networking platform, designing 11 API endpoints covering authentication, user profile management, and connection handling.
- Implemented secure JWT-based authentication with bcrypt password hashing, protected routes, and strong-password/input validation to enforce user authentication and authorization.
- Designed a connection system supporting interested/ignore actions and accept/reject requests, with duplicate-request prevention and paginated user feeds powered by MongoDB and Mongoose.

Bankist App — Interactive Banking Application | *JavaScript, DOM Manipulation*

- Developed a responsive banking application using vanilla JavaScript and DOM manipulation, implementing user authentication, fund transfers, and loan request workflows.
- Built transaction history, running balance calculation, and formatted date display using JavaScript array methods (map, filter, reduce).
- Implemented an auto-logout session timer and event-driven UI updates to enhance interactivity and simulate realistic banking session behavior.
